

Appeal

for a ban of highly hazardous pesticides

Decades of experience has shown that, despite numerous ‘safe use’ programs, the ‘safe use’ of highly hazardous pesticides (HHPs) is not possible. People, farm-animals, wildlife and the environment continue to suffer considerable harm from HHPs. After decades of failure which have seen millions of deaths worldwide, new policies are needed to stop pesticide poisonings. A progressive phaseout and ban of HHPs, along with new policies for supporting alternatives, can make a change towards a healthy and sustainable world for all.

We, the undersigned organizations, call on governments and corporations to take concrete steps towards a progressive ban of HHPs and their substitution with ecosystem-based alternatives.
